

# WHAT IS GPT-4

IT'S NOT ChatGPT

# WHAT IS A GPT

The GPT models are a series of autoregressive language models powered by deep learning, capable of generating language prompts with a click of a button.

# What is GPT-4

GPT-4 is the latest milestone in OpenAI's effort in scaling up deep learning.

GPT - 4

# GPT-4 TO GPT-3

# What is GPT-4

GPT-4 surpasses ChatGPT in its advanced reasoning capabilities.

It is 500X powerful than GPT-3

# How It Differ from ChatGPT

ChatGPT is built on top of OpenAI's GPT-3 and GPT-3.5

GPT-4 is more creative and collaborative than ever before. It can generate, edit, and iterate with users on creative and technical writing tasks, such as composing songs, writing screenplays, or learning a user's writing style.

**gpt-4**

# How It Differ from ChatGPT

GPT-4 surpasses ChatGPT in its advanced reasoning capabilities.

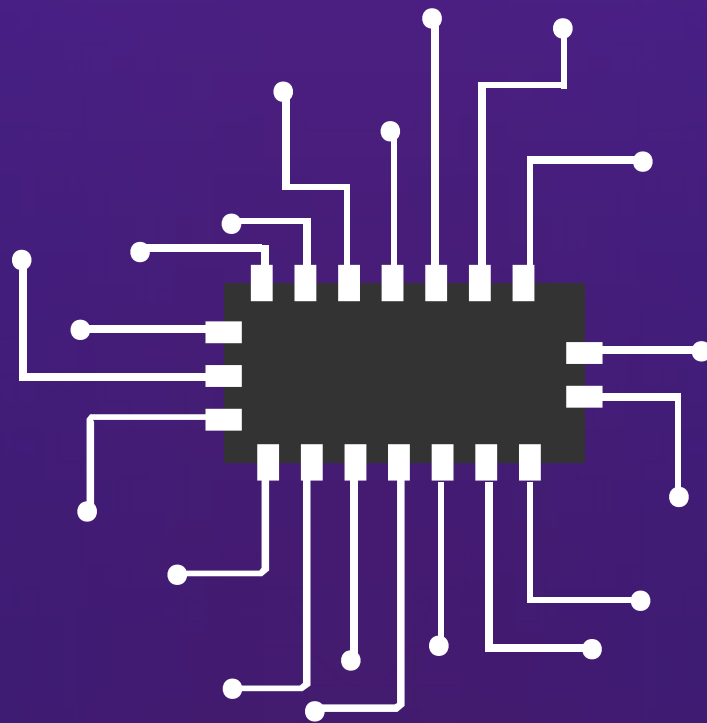

GPT-4 can accept images as inputs and generate captions, classifications, and analyses.

# GPT-4

GPT-4 is available on ChatGPT Plus and as an API for developers to build applications and services.
